Fish That Change Color.

Anglers have noticed that fish of the same species caught in the same stream often differ completely in color and take protective bues that match homes. Herr Otto Gotthilf found by a course of experiments with turbots that this faculty of changing color in accordance with the surroundings is primarily due to the action of light upon the optic nerve. The light does not act directly upon the eye, but is reflected from such substances as are around and affects the coloring cells through the nerve centers of the fish. Proof of this was obtained by severing the optic nerve of the turbot, when it

It is usual to envy the even tempered people-those who are never unduly elated or cast down, who "knit on plain" all the time. If one like that sort of thing it would be equally natural dence of electronistances facts that to envy the animals-cows and pigs, for instance-whose serenity is seldom disturbed. For my part I think those even tempered people lose nine-tenths of the pleasure of existence. The depths of grief and gloom into which impulsive people are thrown are amply made up for by the equally unreasonable and unreasoning joy into which they spring at the slightest possible excuse, and the sorrow of a quarrel with a dear one is paid for in the delight of "makthe prevailing local coloring of their ing up." Parents are very apt to impress on their children the beauty of it is an unwrinkled complexion.-Donahoe's Magazine.

> How Javanese Settle Quarrels. The Javanese manner of settling Review. quarrels is quite original. When one man has offended another the injured party gives notice that he is angry by drawing in the sand before the door of the offender a circle with a straight line across it, indicating that his affection, which would have been eternal, has been cut in two. Friends of both parties then shut them up. They parley awbile, then pretend to be born again, prattle as little children and finally as men become reconciled and embrace. Should one be refractory and refuse to be conciliated he is ostracized by the community so effectually that he is soon brought to terms. It is just possible that our enlightened citizens might consider this method better than knockdown arguments and certainly much cheaper than going to law.

The Ominous Owl. It's an odd thing, but there are a number of people who have a distinct antipathy to the screech owl and cannot listen to a single burst of its hilarity without shuddering. The screech owl is supposed by the negroes on southern plantations to be in direct communication with all the ghosts and giants of the forests. He plays a great part in the more weird folklore stories of the darkies. A funny superstition in regard to the screech owl is that if you will take your shoe or slipper off your left foot the first time you hear an owl laugh and turn the shoe sole upward on the floor and place your "stockin' foot" on the bottom of the shoe's sole the owl will stop laughing

"Some men preach," said Sydney

Smith, "as if they thought sin is to be taken out of a man as Eve was taken out of Adam, by easting him into a profound slumber." So at any rate thought not South, who, preaching one day at Whitehall, observed King Charles II. and several of his attendants asleep. Stooping down he cried out to one of the delinquents "My lord, I am sorry to interrupt you but if you snore so loud you will wake the king." His majesty thereupon awoke and, turning to his neighbor, remarked with his accustomed good na ture: "This man must be made a bish op. Remind me on the next vacancy. He Shut the Fire In.

A bright lad was given a dime the other day by a visitor to whom he had been exhibited as the pride of the household. The youngster promptly lost the coin under the bed in his room found the dime and went downstairs without saying a word about the conflagration. A few minutes later the bead of the house sniffed suspiciously. "I smell smoke," he remarked. "Some-thing's burning." "It's my room," admitted the youthful prodigy, "but," he added reassuringly, with a flash of the brightness in which the family took so much pride, "the fire can't get out. I closed the door tight." The fire department arrived in time to save the house.-Philadelphia Record.

> Looking Glasses In Coffins. One of the ancient customs connect-

ed with Swedish funerals was to place a small looking glass in the coffin of an unmarried female, so that when the last trump sounds she might be able to arrange her tresses. It was the practice for Scandinavian maidens to wear their hair flowing loosely, while the matrons were it bound about the this even disposition, but so far as I head and generally covered with some can see the only benefit derived from form of cap; hence the unmarried woman was imagined as awakening at the judgment day with more untidy locks than her wedded sisters and more in need of a glass.-Westminster
